Executive Summary

Key Insights

- Generated 25.24M in total revenue and 10.10M in total profit from 990,236 customer orders.
- Sold 2.97 Million chocolate units, reflecting strong and consistent customer demand.
- Dark Chocolate 50% emerged as the highest revenue-generating product, making it the primary sales driver.
- Praline was the best-performing category in terms of both revenue and profit.
- Canada recorded the highest country-wise revenue, while Toronto was the top-performing city.
- Customers aged Above 50 contributed the highest share of total revenue.
- Loyalty Members generated slightly higher revenue than non-loyal customers, indicating successful customer retention.
- Revenue and profit remained stable across 2023–2024, with February consistently showing the lowest performance due to seasonal demand.
- Data quality validation improved database reliability by removing 9,764 invalid sales records, resulting in a clean dataset of 990,236 records for analysis.

Business Recommendations

- Increase inventory for top-selling products such as Dark Chocolate 50% and Truffle Chocolate 80%.
- Expand marketing and sales efforts in Canada and Toronto to maximize revenue.
- Strengthen the Loyalty Program to encourage repeat purchases.
- Launch promotional campaigns during February to reduce seasonal sales decline.
- Target customers aged Above 50 with personalized offers and premium products.
- Continuously monitor product master data to maintain high data quality and prevent missing Product IDs.

Conclusion

This Power BI dashboard provides a comprehensive view of sales, profitability, customer behavior, product performance, and regional trends. By combining SQL, Python, and Power BI, the project transforms raw data into actionable business insights, enabling stakeholders to make data-driven decisions, optimize business performance, improve customer engagement, and support sustainable revenue growth.
